

Zley® P-hydroxyacetophenone

Basic Information

- INCI: p-hydroxyacetophenone
- CAS: 99-93-4
- Main component: 4-hydroxyacetophenone
- Suggested usage amount: 0.2-0.6%
- Recommended usage way: It is soluble in hot water, methanol, ethanol, diethyl ether, acetone, benzene, but insoluble in petroleum ether. It is soluble in 100 parts of water at 22°C and 14 parts of water at 100°C.

Product Description

P-hydroxyacetophenone is a natural plant extract, which exists in the stems and leaves of Artemisia scoparia of Compositae, the roots of Artemisia capillaris, Arubaceae plants, ginseng waierteng and other plants.

- (1) New cosmetic raw materials with anti-corrosion and synergy promotion;
- (2) It is effective for fungi and needs to be combined with traditional preservatives, which can reduce or even avoid the use of traditional preservatives (phenoxyethanol, Nepalese gold and other traditional preservatives) and accelerate sterilization more comprehensively.
- (3) Anti-oxidation, anti-stimulation, emulsifying stabilizer and product protective agent;
- (4) It is called green without added preservatives as it is not included in the cosmetic anti-corrosion list;
- (5) Used as preservatives in masks, wet wipes and water-based cosmetics.

Technical Indicators

Inspection items	Technical index
Appearance	White or light white powder
Melting point (°C)	109.0~113.0°C
Chloride (%)	Not more than 0.05%
Loss on drying (%)	Not more than 0.5%
Heavy metals	Not more than 10PPM
Related substances(%)	Not more than 0.10%
Contents (HPLC, %)	Not less than 99.0%

Product Usage:

It is mainly used as preservatives in cosmetics and skin care products and widely used in skin care products such as cream, facial mask, eye cream, essence, shampoo, cold ironing agent, hair dye, conditioner, soap, paste shampoo and other alkaline cosmetics and detergents.
